on Space Applications

Bangkok, 18-19 September 2018

ASI space activities

Patrizia Sacco
Italian Space Agency

ITALIAN SPACE AGENCY

www.asi.it

ASI is a public Agency, controlled by the Italian Ministry of Education, University and Research which main aims are:

- Elaboration of national space strategies through the drafting of the National Space Plan
- Promotion and financing of Scientific and Technological Space Research
- Support of Space Education and Training of students and young professionals
- Promotion and support of national aerospace industry

ITALIAN SPACE AGENCY

New space governance

Following on going activities, past successful investments and top priorities, Italy established a new space governance at the highest level. It came into force in February 2018

The new space governance under the control of the Prime Minister, foresees the creation of a Committee which includes the Council Presidency, ASI and representatives from different Ministries interested in space activities (e.g. foreign affairs, university and research, transport)

ITALIAN SPACE AGENCY

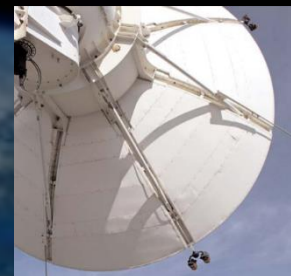

At international level...

In coordination with the Ministry of Foreign Affair and International Cooperation (MAECI), the Agency:

- ✓Coordinates the Italian participation in ESA programs and activities;
- ✓Supports the Italian participation in European Union programs for the promotion of space research and technology;
- ✓Negotiates and defines bilateral and multilateral space agreements with other agencies and countries;
- ✓Maintains international relations with other space countries
