Copernicus Maritime Surveillance: Background

- EMSA is the “Entrusted Entity” for the implementation of Maritime Surveillance Services

3 December 2015

*Miss Lowri Evans (Director General – DG-GROW)
and Mr. Markku Mylly (Executive Director –
EMSA) sign the Delegation Agreement*

Objective of CMS

Better understanding and improved monitoring of activities at sea

- Objective: *understand, manage and/or prevent activities carried out at sea that could impact the security, safety, economy, or environment of the European Union and its Member States.*

Security

SAR and optical delivery times

Synthetic Aperture Radar

Quasi-real time in Europe (value added products delivered to users within 30 min).

Near real time outside Europe (using on-board recorders)

© ESA

© ESA

Optical

Delivery 45 min after satellite overpass (basic products).

Delivery 60 min after satellite overpass for value adding products (vessel detection and activity detection)

*Times refer to the fastest delivery times for the relevant products.

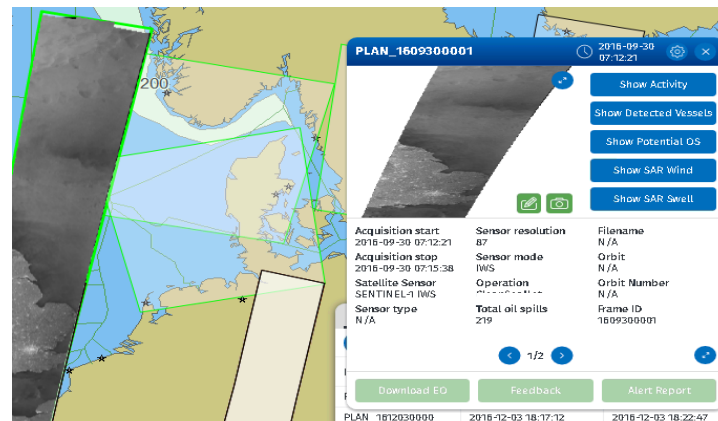

Security

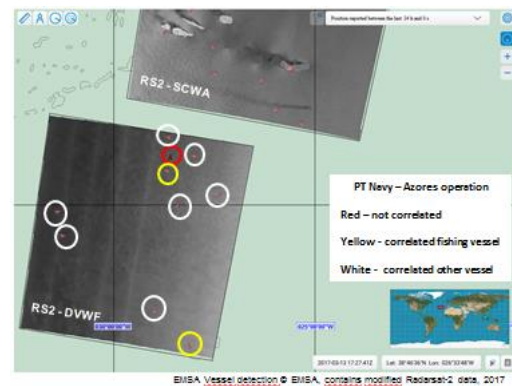

EO data combined with other sources

CMS establishes an Earth Observation (EO) component to wide range of integrated maritime services:

- EO data is combined with other information, e.g. vessel detection, vessel tracking, intelligence, to provide more powerful overview of activities at sea

© EMSA

© EMSA

Security

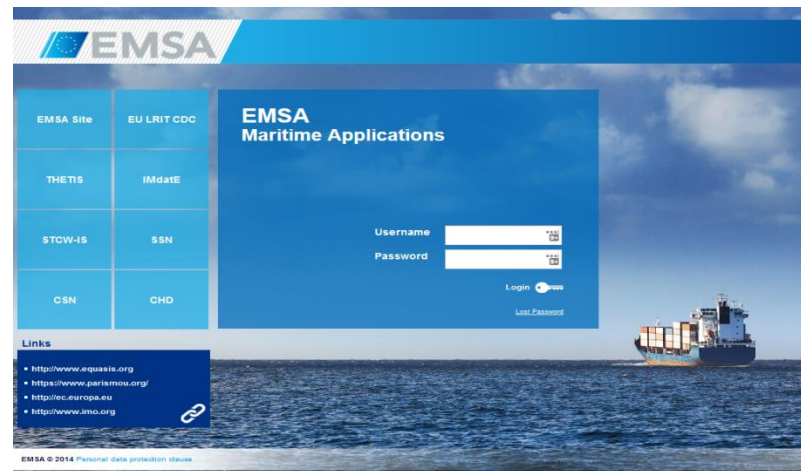

CMS – Access for authorised users only

Combined data:

- Earth observation satellite data
- EMSA's maritime applications (e.g. vessel reporting positions)
- External sources (as requested by users)

Secure access:

- Access under specific conditions
- Data delivered directly to user

Security

Function areas served

Fisheries Control

Maritime Safety and Security

Law Enforcement

Customs

**Marine Environment
Monitoring**

**Other (support to
international organisations)**

Security

CMS - Fisheries Control

EO capabilities in support of operational activities:

- Monitoring of fishing grounds
- Monitoring of fish cages/farms
- Monitoring of fishing ports

Vessel towing fish cages © European Space Imaging/DigitalGlobe 2013

Fishing vessels in port © CNES 2016, Distribution Airbus DS

Security

CMS – Maritime Safety and Security

Main applications identified under maritime safety and security function area include support to:

- Search and rescue operations
- Safety of navigation, including support to ice and iceberg monitoring
- Maritime security (including ship to ship transfers)

RADARSAT-2 Data and Products © MacDONALD, DETTWILER AND ASSOCIATES LTD, 2016 – All Rights Reserved” and “RADARSAT is an official mark of the Canadian Space Agency

Security

CMS – Law Enforcement

CMS service provides:

- Monitoring of ports and shores for departure of specific ships
- Detection of abnormal behaviour (e.g. transshipment of drugs from larger vessels to small boats)
- Search for non-cooperative targets

Security

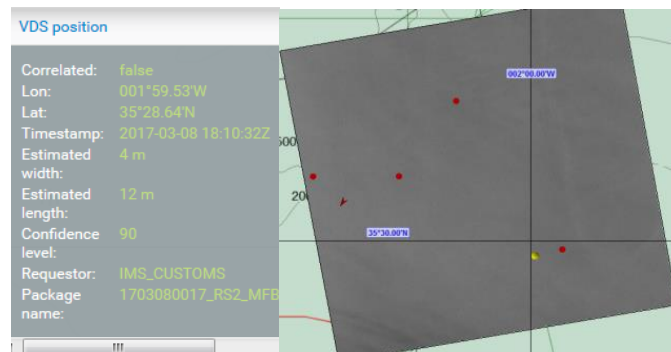

CMS – Customs

Satellite monitoring may provide support to:

- Monitoring ports for departure of specific ships
- Detection of abnormal behaviour
- Monitoring ship-to-ship transfers
- Early warning of criminal trafficking

© CNES (2017), Distribution Airbus DS

© EMSA

Security

CMS – Marine Environment (Pollution)

Pollution monitoring support consists of:

- Detection of illegal oil discharges in marine environment and identification of possible polluters
- Early warning/identification of incidents/accidents that may have an environmental impact
- Support for pollution response operations

© EMSA

Security

CMS – Other

Copernicus provides capability to extend the scope of CMS beyond European waters to other areas of European interest.

CMS – Support to ASEAN countries

Beyond Europe:

- CMS support to international organisations is coordinated with the European External Actions Service (EEAS)
- Requests received in the context of the Common Foreign and Security Policy (CFSP) of the EU

Support to UNODC in Southeast Asia:

- UNDOC's Global Maritime Crime Programme (GMCP) supported by the EU
- Activations requested:
 - Sri Lanka, June 2017
 - Sri Lanka, June 2018

UNODC

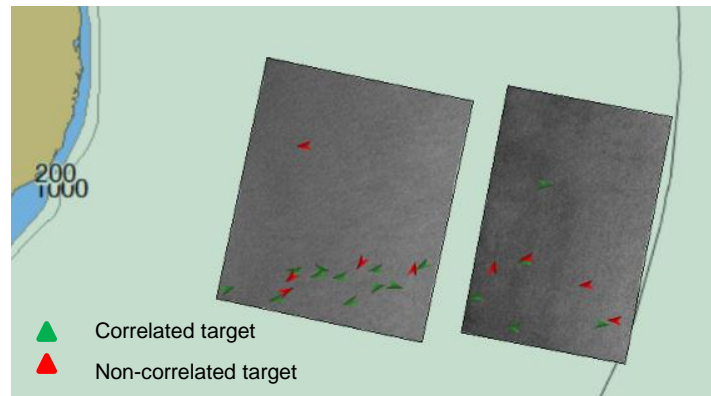

United Nations Office on Drugs and Crime

Cooperation with UNODC: Sri Lanka 2017

Maritime law enforcement:

- 9-13 June 2017
- Objective: Test law enforcement capacity in the south eastern sector of the Sri Lankan EEZ.
- Services delivered: 2 image products (1 RadarSat-2; 1 TerraSAR-X) with supporting data.
- Authorities involved: UNODC, EU Delegation (Colombo), Sri Lankan Ministry of Fisheries and Aquatic Resources, Sri Lankan Navy.

Security

Cooperation with UNODC: Sri Lanka 2018

Illegal transshipping:

- Date: 25-28 June 2018
- Objective: Test authorities' capacity to fight illegal transshipping by foreign fishing trawlers.
- Services delivered: 3 image products (1 RadarSat-2; 2 TerraSAR-X) with supporting data.
- Authorities involved: UNODC, EU Delegation (Colombo), Sri Lankan Navy.
